

Clearspeed offers a highly scalable and effective voice analytics solution that quickly assesses an individual’s risk level with respect to specific themes, issues or topics. Our solution can be quickly and effectively applied for fraud, security, or safety risk screening to clear the low-risk majority of people and transactions faster, while identifying potential high-risk responses that are often missed. Clearspeed enables your teams to focus on high-risk responses in applications, claims, recruiting, and workforce screening.

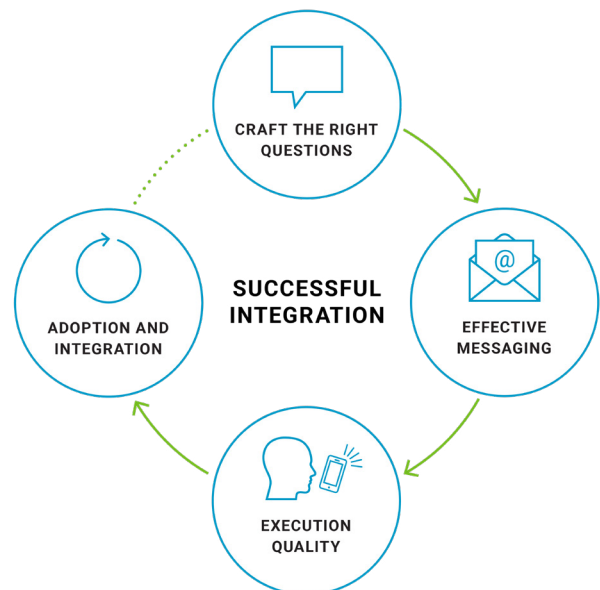

Clearspeed provides unique risk alerts based on vocal responses to simple Yes/No questions and the solution can be easily implemented to address your organization’s risk issues. Our Customer Success team will work with you throughout the process to ensure we are fully aligned to meet your objectives. Here is a quick snapshot of our implementation process:

- **GATHER REQUIREMENTS:** Discuss specific risk issues, number of participants, desired language(s), and logistics.
- **CRAFT QUESTIONS:** Our experts collaborate with you to develop Yes/No questions that address your risk issues.
- **UPLOAD TO CLOUD:** The final questionnaire is recorded and uploaded to our secure cloud server.
- **MESSAGING AND COORDINATION:** Identify the most effective communication channels and provide templates.
- **PARTICIPANTS CALL IN:** Once calls begin, our Customer Success team will monitor progress and provide updates.
- **RESULTS AND ANALYSIS:** Final risk results and custom reports are available in your dedicated web application.
