

Clearspeed Verbal

Clearspeed Verbal™ voice analytics delivers a powerful vetting solution for fraud, security, and safety risk assessment screening. By providing unique risk alerts based on an individual's vocal responses to an automated telephone questionnaire, Clearspeed can quickly and effectively clear the low-risk majority, while identifying potential high-risk responses. By stratifying risk efficiently and early, you can now focus on the most critical people in your organization that are often missed through traditional vetting processes.

DASHBOARD

The Results page for Security Audit Q1 allows for detailed filtering and viewing of individual participant results. It includes filters for Overall Risk (High, Potential, Average, Low) and Sub Filter (Counter Measure, Admission, Not Complete). A search bar is available for IRN and Name. The results are presented in a table with columns for IRN, Name, Position, Date, Access Code, Overall Risk, and seven individual question results (1-7), each with a corresponding risk level indicator (L, A, P, H) and a PDF icon.
